FICTIONAL PORTFOLIO EXAMPLE

# Juniper Paper Studio

Paper studies

## Quiet Fold, 2026

AI-generated digital paper-collage study

Sample introduction: a fictional studio exploring folded forms, torn edges and quiet contrast.

FICTIONAL PORTFOLIO EXAMPLE

# Quiet Fold

One artwork. A clear brief and an honest process.

## Brief

Create one original, text-free abstract image that combines ivory, charcoal and muted amber. The example explores paper-like surfaces and a clear focal fold rather than representing a real commission.

## Process

The artwork was generated in a Ciyo development workspace on November 21, 2026, using GPT Image 2.5 Flare. Its downloaded source is 896 by 1120 pixels. The portfolio text and this two-page PDF were assembled separately for the article.

## Reflection

A folded ivory strip crosses a torn charcoal form, while a muted amber curve creates a second point of emphasis. These are visual observations about a digital image, not a record of physical fabrication or measured audience response.

## Caption and sharing check

Keep the title, year and medium with the artwork. Replace sample copy with approved information before sharing your own portfolio. Check the recipient's requested file size, page count and submission format.
